

Installing Nod32 3.0 Home Edition onto Windows 2000 Pro

Note: Nod32 3.0 HE will not install on a Windows 2000 Server; this requires the Nod32 3.0 Business Edition. To run the Home Edition on Win. 2000 Server, you will need to download and install Nod32 version 2.7 Home Edition.

Before you install Nod32 3.0 Home Edition you will need to make sure Windows 2000 Pro has received Microsoft's Service Pack 4 upgrade.

You can download the Service Pack 4 from this link: [Microsoft Windows 2000 Service Pack 4 Download](#)

You can check to see if Service Pack 4 is installed by right clicking MY COMPUTER Icon on the Desktop. Select Properties from the right click menu, the Properties Window should come up. Under General Tab of Properties, you will see System Information, your installed Service Pack will be listed (Example: Service Pack 2, 3, or 4). If you have Service Pack 4 installed, you may download and Install Nod32 3.0 Home Edition. If it is not, please download and Install from the above link, before installing Nod32 3.0 Home Edition.
