

## **Software Security Solutions Agrees to Provide Corporate Technical Support Services for PestPatrol**

Lakewood, CO, April 2003 - Software Security Solutions, a single source provider for security needs, is pleased to announce an agreement to provide world-wide Corporate Technical Support Services for PestPatrol. These services include Pre and Post Sales Technical Support for their corporate customers as well as quality assurance testing.

The agreement presented will have Software Security Solutions as the central point of contact for technical and sales support issues. Corporate customers requiring either pre or post sales support will be directed to Software Security Solutions dedicated LABS to replicate customer environments for testing and troubleshooting.

**About PestPatrol** – PestPatrol is a privately owned security software manufacturer located in Carlisle, PA. Releasing the corporate product to the public in February of 2002, PestPatrol is one of the earliest known anti-hacker security tools on the market.

The company was founded by Bob Bales and David Stang in 2001 who also founded the NCSA (National Computer Security Association) which later became the ICSA (International Computer Security Association) and is now a part of Tru-Secure. The threats from non-viral malicious code (NVMC), or Malware – from Trojans, hacker tools, Spyware, and Adware, collectively known as pests, were the reason behind PestPatrol's choice to create a product to fight these pests.

### **About Software Security Solutions:**

Monte Robertson and his company TTC LLC began working with PestPatrol as a reseller in March of 2002. Software Security Solutions quickly became the subject matter expert of PestPatrol and the threats from NVMC. Software Security Solutions provides a single point of contact to support layered security needs for consumers and small to mid-sized businesses. The company's security categories include Anti-Virus, Spyware Removal, Personal Firewall, Spam Blocker, Backup,

**Internet Filtering, and Encryption Software. The Internet security products are tested and proven to be leaders in each security category. Additional information about Software Security Solutions is found at [www.SoftwareSecuritySolutions.com](http://www.SoftwareSecuritySolutions.com)**
