

Software Security Solutions adds NOD32 Anti Virus

Lakewood, CO, July 2002 - Software Security Solutions, a single source provider for security needs, is pleased to announce the addition of NOD32 Anti Virus software to our product listing. NOD32 is one of the leading anti virus products with Advanced Heuristics; that maximize detection and performs at blazing speeds.

About Adding NOD32 - Software Security Solutions was contacted by NOD32 as a possible reseller of the product. The product was tested and compared to market leading Anti Virus products in our lab. Virus Bulletin released their comparative review of the Anti Virus products the same month: and NOD32 won the coveted "VB 100%" award for the 18th time. With this proven award winning product, Software Security Solutions has strengthened its product offering to our consumer and small business customers.

About Eset - Founded in 1992 and headquartered in San Diego, Calif., Eset is a global security software solution company that provides next generation virus protection. Eset's award-winning anti-virus software system, NOD32, assures maximum network performance, advanced heuristic detection, and free worldwide support. NOD32 provides enterprise customers with the highest ROI in the industry as a result of increased user compliance, decreased downtime, and higher productivity. NOD32 holds more Virus Bulletin 100% Awards than any other anti-virus product available, consistently detecting all known viruses "in the wild" without false positives, in these tests. Eset's work with major corporations like Canon, Dell and Microsoft has propelled the company into Deloitte's Technology Fast 500 two years running. Eset is a privately held company with offices in San Diego, US, London, UK, Prague, CZ, and Bratislava, SK.

NOD32 overall features include:

- Never missed a virus in the wild in the Virus Bulletin tests, for over five years and counting.
- Received an unprecedented number of 100% Virus Bulletin Awards since first being submitted in May of 1998.
- Proven five to fifty (5-50) times faster than other Anti Virus Solutions as shown in the Virus Bulletin tests.
- Provides extremely high detection rates, for detecting all viruses listed by The WildList Organization International.
- Uses un-matched heuristic analysis, capable of detecting Boot, Win32, DOS, macros and scripted viruses and worms.
- Uses virtual emulation for detecting the most sophisticated polymorphic and metamorphic viruses.
- Detects viruses in compressed or protected executable files (like Zip files). Detects viruses in encrypted password protected databases and documents.
- Cleans macro-viruses and restores documents to their original format.
- Reconstructs important system areas and functions in the event of an infection.

About Software Security Solutions

Software Security Solutions provides a single point of contact to support layered security needs for consumers and small to mid-sized businesses. The company's security categories include Anti-Virus, Spyware Removal, Firewall, Pop Up Blocker, Spam Blocker, Backup, Internet Filtering, and Encryption Software. The Internet security products are tested and proven to be leaders in each security category.
